get to know.

A results-driven Full Stack Developer with over 4 years of experience in the complete software development lifecycle, encompassing the design, development, and deployment of web and mobile applications. Mobile application development is a key area of expertise, demonstrated through proficiency in Flutter and React. This includes the development and deployment of responsive applications, with a focus on creating user-friendly interfaces and optimizing front-end performance.

Throughout their career, they have consistently delivered successful projects, showcasing an ability to enhance application performance, shorten development cycles, and improve overall user satisfaction. Their experience includes effective collaboration within Agile environments and across cross-functional teams, ensuring seamless integration and successful project outcomes. A commitment to clean code practices and innovative solutions is central to their approach in tackling complex challenges and achieving project objectives.

Consultant @ Full-Stack Developer
Netherlands, 05-2024 / Present

Role: Flutter Developer

Main Activities:

- Developed and deployed modular applications in a microservices architecture using a tech-independent approach (Java, Python, Node.js), tailored to each service's requirements.
- Introduced TDD practices across 3 teams, increasing code coverage to 85% and reducing bugs in production by 50%.
- Automated CI/CD with GitHub Actions and Docker, reducing downtime and improving release speed by 50%.
- Collaborated with cross-functional teams to deliver high-performing components with clear domain boundaries.
- Developed 10+ responsive apps with Flutter and React, reducing front-end bugs by 40%.
- Designed and deployed scalable RESTful APIs, integrating services with Docker and Redis, improving response times by 35%.
- Integrated third-party APIs enhancing user experience by 30%.
- Mentored 3 junior developers and led weekly sprint reviews with cross-functional teams.

Consultant @ Value Network
Belgium, 01-2024 / 04-2024

Role: Front-end Developer

Main Activities:

- Created reusable React components across 5 projects, improving maintainability by 25%.
- Implemented mobile-first, SEO-optimized layouts, increasing web traffic by 18%.
- Collaborated with backend teams to integrate 20+ endpoints into production UIs.
- Diagnosed and resolved performance bottlenecks, achieving 95% Lighthouse score.

Consultant @ She-Exist Digital
USA, 01-2023 / 12-2023

Role: Full-Stack Developer

Main Activities:

- Designed RESTful APIs and led backend development for 3 web applications.
- Cut manual deployment times by 60% with Jenkins CI/CD automation.
- Reduced feature delivery time by 40% through Agile sprint optimizations.
- Wrote internal documentation and contributed to architectural decisions

Consultant @ Back2Basic
Netherlands, 02-2022 / 12-2022

Role: Front-end Developer

Main Activities:

- Maintained and enhanced 8+ WordPress websites with custom themes and SEO improvements.
- Boosted average session duration by 20% through responsive UI enhancements.
- Tracked analytics to guide UX decisions, increasing user engagement metrics.
- Liaised with stakeholders to implement scalable e-commerce features.
