Android

### get to know.

Experienced Mobile Developer with over 15 years in the tech industry and a strong focus on Flutter since 2018. Skilled in building and deploying cross-platform mobile applications from the ground up for both iOS and Android, with deep expertise in app architecture, CI/CD pipelines, integration testing, and clean state management (BLoC). Prior experience includes native Android development as well as working with React Native, Unity, and Xamarin, giving a comprehensive understanding of the mobile landscape.

Comfortable leading teams and mentoring developers, with hands-on contributions to multiple successful product launches in sectors such as health tech, fintech, video editing, and consumer apps. Highly business-oriented and quality-focused, with a pragmatic approach to balancing development effort with product value. Strong advocate of automated testing, clean code, and scalable architecture design.

### studies.

Master's degree (Uzhgorod National University)

Theory of optimization and system analysis, 2005 - 2010

### languages.

	Reading	Speaking	Writing
English	Independent (B2)	Independent (B2)	Independent (B2)
Ukrainian	Mother tongue	Mother tongue	Mother tongue

experience.

Consultant @ onDiem.com

Portugal, 01-2022 / 11-2024

**Role:** Flutter Developer

**Main Activities:**

- Developing the app from scratch to its release in stores.
- Designing the app's architecture.
- Collaborating with the product designer and product owner to ensure top-quality delivery.
- Training a junior Flutter developer.
- Developing and setting up automated testing, specifically integration tests.
- Setting up the CI/CD infrastructure: running code tests on Codemagic, using linters for code checks, and managing app builds and releases for internal testing channels and store publication.
- Our development was focused exclusively on Android and iOS platforms.

[Software Engineer](#) @ Freelance

[Remote](#), 11-2014 / 01-2020

**Role:** Mobile Developer and Architect

**Main Activities:**

- Designed and developed a fitness tracking application for Android Wear, focusing on user experience, wearable integration, and real-time data monitoring.
- Ensured seamless performance on wearable devices through efficient resource management and battery optimization.
- Conducted thorough testing and debugging to ensure functionality across a range of Android Wear devices.
- Developed and maintained mobile applications for multiple clients in an outsourcing environment, delivering custom features based on client requirements.
- Collaborated with cross-functional teams to implement project specifications, troubleshoot issues, and deliver updates.
- Worked across a variety of app types and industries, gaining broad exposure to client needs and mobile development best practices.
- Led and coordinated a volunteer team during Central and Eastern Europe's largest Google developer conference, with over 700 attendees and 30+ international speakers.
- Managed end-to-end logistics for attendee experience, including check-in, badge distribution, and onsite support.
