get to know.

Senior Mobile Software Engineer with 13 years of experience in native Android and iOS development, with a strong emphasis on Kotlin and Swift. Over the course of more than a decade, he has contributed to strategic projects for major companies in the retail, gaming, technology, and government sectors, taking on roles as both developer and technical lead. He has deep expertise in crafting modern, responsive user interfaces using Jetpack Compose as the primary UI framework on Android, seamlessly integrated with traditional XML Views, and solid experience with UIKit on iOS.

He has worked extensively with RESTful service integration using Retrofit and Volley, reactive programming with RxJava, and concurrency management with Kotlin Coroutines. In large-scale projects, he has taken on technical leadership responsibilities, helping define MVVM-based architectures, mentoring development teams, and fostering Agile practices such as Scrum and Kanban. He has also focused heavily on application quality, implementing unit, integration, and automated UI testing using tools like Mockk, Espresso, and Compose UI Testing.

Also, he is proficient in continuous integration and delivery practices, with pipelines built using GitLab CI, GitHub Actions, and Azure DevOps, and has strong command of version control with Git.

studies.

Bachelor's Degree (Pontifícia Universidade Católica do Rio Grande do Sul)
Bachelor's Degree in Computer Science, 2009 - 2013
